**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe any of the following method steps: during a first period of time of polishing, applying a common first pressure to each chamber so as to apply the same pressure at each portion of the substrate receiving surface, after the first period of time of polishing, reducing a pressure of at least one of the plurality of chambers while continuing to apply the first pressure to a remainder of the plurality of chambers, halting application of positive pressure to the at least one of the plurality of chambers, after a second period of time of polishing, reducing a pressure of the remainder of the plurality of chambers, selecting the first period of time and second period of time to provide uniform polishing of the substrate.

***Conclusion***

Art Unit: 3723

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakashiba et al, Takahashi, Korovin et al, Hollatz et al and Schultz et al are cited to show method and apparatus of chemical mechanical polishing.
